

# ROBOTICS

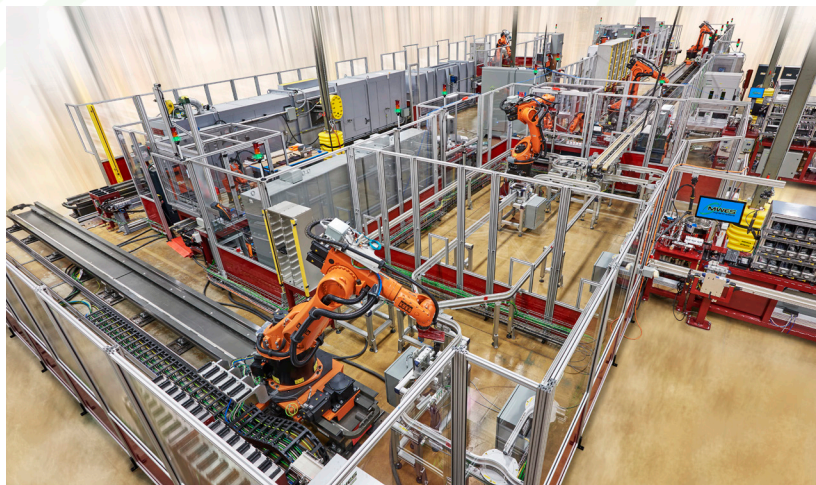

From small, stand-alone systems to large integrated processes, Midwest Engineered Systems custom designs each robotic integrated system for your specialized needs. MWES has designed and installed hundreds of robotic-based systems, from startup companies to Fortune 500 corporations.

Our design and build solutions can include: customized robots, specialized End-of-Arm-Tools (EOAT), cable solutions, vision systems, safety enclosures, process monitoring, control systems, and other technical equipment, to help you and your organization to improve your manufacturing process.

## COMMON ROBOTIC APPLICATIONS:

- Bin Picking
- High-Speed Vision Inspection
- Picking and Packaging
- Press Brake Automation
- Robotic Assembly
- Standard Machine Tending
- Surface Treating
- Vial Filling
